

## Metalwork – Oxy-Acetylene Basic Setup Written Test

Bonus \_\_\_\_/2 Total \_\_\_\_/8

Name: \_\_\_\_\_ Block: \_\_\_\_ Date: \_\_\_\_\_

**Bonus Question:** What are two things to look for prior to starting the first step of our 8-step setup process with the Oxy-Acetylene torch? There are many more than two. **Max bonus of 2 marks**

a) \_\_\_\_\_

b) \_\_\_\_\_

Each answer below should contain some certain key words to indicate you have covered the entire step. An example for a different machine might be:

*Use a chuck key to tighten or loosen drill bits in the drill-chuck.* That example used 3 main ideas or objects.

**In order, as discussed in class, please write out the 8-step process we use when setting up the Oxy-Acetylene tanks and torch. This does not include lighting the torch.**
