

## **Course Outlines - Woodwork 11/12 - Furniture and Cabinetry 12**

Covid19 has brought about a number of changes to our current education system. Instruction has been drastically modified and as a result, learning has been affected. This is especially true in the (hands-on) Technology Education classes @NKSS.

The following (modified) activities have been created to fulfill (certain) Prescribed Learning Outcomes and Core Curricular Competencies for this course.

[Woodwork 11](#)

[Woodwork 12](#)

[Furniture and Cabinetry 12](#)

From the onset of this pandemic, NKSS students have been encouraged to commit to participating in (a minimum of) 2 hours of learning time per class each week.

In order to help students achieve this “minimum” they must continue to choose from (one or both) of the following three options for modified learning. Again, these activities have been designed as a response to the current situation. They are in place to support and facilitate student learning at this time.

### OPTION #1

#### **Video and Research Learning Activities**

Weekly assignments, and videos with response sheets help students to be able to identify Materials, Processes, Tools and Machines commonly used in Woodworking.

### OPTION #2

#### **Projects @Home Activities**

Students (safely) engage in a variety of Woodwork related projects at home and provide detailed records of their learning as it relates to the Materials, Processes, Tools and Machines used in their projects.

### OPTION #3

#### **Combination of the above (OPTIONS #1-#2)**

Students may choose this option to help them fulfil the minimum learning time of 2 hrs per week.

### ASSESSMENT

Participation and completion marks are assigned as students submit their activities in a timely, thorough and thoughtful manner.
