

Metal Stick Figurine Scene

_____/10 marks

Sketching ideas

Name: _____ Block: _____ Date: _____

Your scene should tell a story. Don't just have a bunch of figures or objects standing around. You should find a way to convey MOVEMENT and the viewer should almost instantly be able to tell what is happening.

Can't draw? Remember that this project will be made from wire and scraps so drawing stick figures is perfectly fine.

Must Include:

- A base or ground (made from scrap sheet metal)
- At least one figure (animal, human, vehicle, bike, sports player, musician, etc)
- Accessories (clothing, armor, furniture, etc)
- A sense of movement (jumping, kicking a ball, swinging a bat, etc)

Tips for people:

- People can be made from three pieces: Arms/hands, Legs/feet, Body/head. Keeping it simple will make assembly and welding easier as well as force you to think about your design before cutting. You do not have unlimited metal for this!

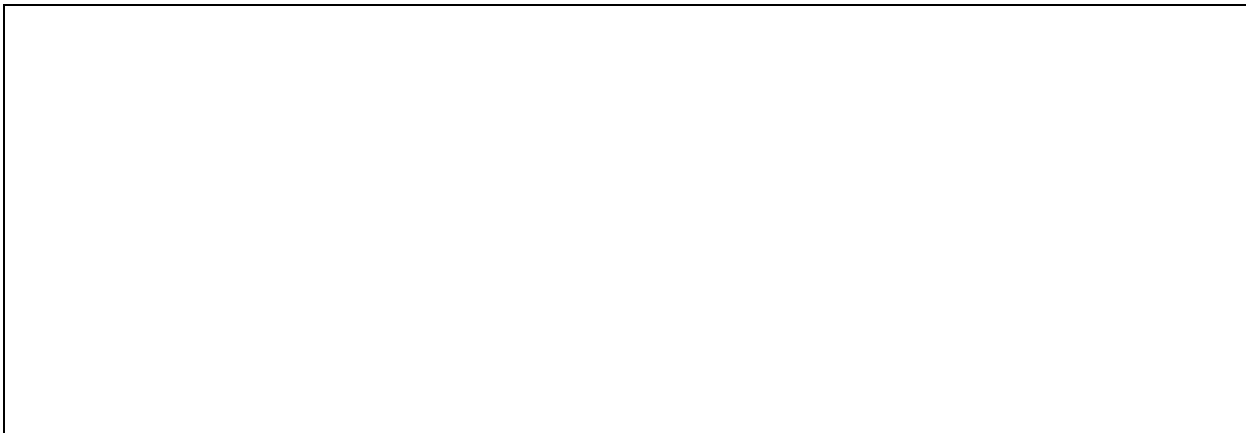

Draft Ideas:

You must have an approved and detailed sketch outlining all the required "Must Include" objects. **You should draw the object life size** so you can easily measure and transfer your ideas into metal.

You may be asked to make a 2nd sketch if more detail is required.

Thumbnail sketches:

_____/ teacher initials

Please draw full size sketches on the back after teacher approval of your idea: →

Full size sketches:

_____ / 10 marks

A large, empty rectangular box with a thin black border, occupying most of the page. It is intended for drawing full-size sketches.
